

## ASCII Hex

If the 10th letter in English alphabet has the ASCII code of 74 in decimal, what is the ASCII code of the 20th letter in hexadecimal? Write your answer in the form of 0x??.

## Task

Determine the ASCII code of the 20th letter in the English alphabet and provide your answer in hexadecimal format (e.g., 0x??).

Store your answer as a string in the variable `ans`.

## Sample submission

Declare a variable `ans` with the correct answer:

```
ans = "0x3f" # Your answer here as a string
```

## Note

- The answer should be a string in hexadecimal format (e.g., "0x3f")
